

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

# *The Boston Lying-in Hospital.*

---

## I. SERVICE TO THE COMMUNITY.

The Trustees and Managers of the Boston Lying-in Hospital believe that it deserves well of this community. They ask for co-operation and assistance, not only in caring for patients in the Hospital and in their homes, but also in bringing comfort and benefit to every home and to every class of the community.

A few of the patients are able to pay the sum charged for their care and treatment, some can pay a part, but by far the larger part of the patients have no money. The Hospital has funds which insure its permanency, and the income from these funds defrays a portion of the current expenses; the remainder must be supplied by its friends and the public, or its work must be curtailed. Larger donations will enable an increase and extension of its work.

The Hospital by its facilities is enabled to send, at small expense, physicians and trained nurses to care for in their homes, at time of childbirth, mothers who can ill afford physician or nurse.

A considerable proportion of the cases received in the Hospital are patients whose conditions have baffled the efforts of attending physicians, or have presented complications which seriously threaten the life of the mother or the child to be born. The superior facilities of the

Hospital and the larger skill of the attending staff and nurses have assured security and life to both mother and child.

The Hospital educates doctors, medical students, and nurses for the better treatment and care of women in the period of maternity. The large collection of difficult cases, the careful watching and treatment of patients under the most favorable auspices, and the combined skill of expert physicians in the application of improved methods make possible a great advance in the science and practice of obstetrics.

## II. RECORD OF WORK ACCOMPLISHED.

### (1.) *Treatment of Patients in the Hospital.*

The work done in the Hospital during the past year is shown by the following figures :

Number of patients (mothers) cared for . . .	600
Number of children born and cared for . . .	603
Daily average number of patients . . . .	25.8
Average length of stay in the Hospital, in days,	16.1
Number of deaths of patients . . . . .	12
Average cost of patients . . . . .	\$32.51
Average cost of patients per week . . . .	\$14.14

### (2.) *Attendance upon Out-Patients.*

Number of out-patients attended in confinement . . . . .	1,829
Number of children born . . . . .	1,754
Daily average number of visits made . .	76.9
Total number of visits made . . . . .	28,075
Number of deaths during confinement . .	2

The out-patients in their needs have been visited by trained nurses, five of whom, all graduates of the Hospital Training School, have been constantly in attendance, and others as emergencies have demanded.

(3.) *Education and Training of Physicians and Nurses.*

Number of House Physicians who have received diplomas for six months' service . . . . .	6
Number of medical students who have assisted Out-patient Physicians . . . . .	147
Number of Nurses who have received diplomas as graduates of the Training School:	
Graduates of other training schools after six months' course . . . . .	13
Others than graduates after fifteen months' course . . . . .	3

III. EXPENSES.

The expenditures for carrying on the work of the Hospital proper amounted to \$19,236.28, the special expenses for the Out-patient Department were \$916.72, and other current general expenses amounted to \$272.85, so that the total expenditures were \$20,425.85. During the past year donations and income from the Hospital funds have been barely sufficient to carry on the Hospital in its ordinary work. The Trustees have been unable, in ways which are desirable, to increase the efficiency of the work and to make various improvements which are urgently demanded.

## IV. DONATIONS.

The members of the Medical Staff and the House Physicians devote their services gratuitously. The nurses receive little more than nominal compensation for their labors. Patients with narrow resources contribute according to their means. The Trustees urge from the public, who receive more or less directly the benefits which the Hospital bestows, more liberal contributions to continue and increase its usefulness. It costs, upon the average, for each patient treated in the Hospital, \$32.51. A donation of \$100 provides for the treatment in the Hospital of three mothers and the three children who are born to them. A donation of \$10 would alike give this assistance, in the time of their great need, to three mothers and their children in their homes.

Such cash donations, whether large or small, as each individual donor may be disposed to bestow, will be gratefully received; and articles of use and comfort for infants and mothers are welcome at all times.

Donations may be forwarded to the Treasurer, Charles S. Hamlin, 109 Ames Building, or may be left at the Hospital, No. 24 McLean Street, with Mrs. Higgins, the Superintendent, who will gladly receive any friend or visitor interested in the Hospital. Not only the Superintendent at the Hospital, but the officers, the physicians, and the members of the Board of Lady Visitors, will cordially welcome inquiries as to the Hospital's needs and opportunities for doing good from all who are interested in the various departments of its work.

A careful perusal of the reports of the Executive Committee, adopted by the Trustees and of the Visiting Physician, which are herewith presented, is earnestly requested.

V. REPORTS OF THE TRUSTEES AND OF THE  
VISITING PHYSICIAN.

(1.) *Report of the Executive Committee adopted  
by the Trustees.*

The records of the Hospital in the various departments of its activity, medical, charitable, educational, and scientific, show that its work has been carried on during the past year to an extent and with an efficiency equalling, if not surpassing, those attained in any previous year.

The number of patients treated and attended has been 2,429, larger by 22 than in any year hitherto. There were afforded in the Hospital 9,454 days' treatment of patients, and 28,075 visits were made to out-patients.

The proportion of unmarried patients again decreased by about 3 per cent. from that of the preceding year, the unmarried patients last year constituting 21 per cent. of the entire number.

Patients in the Hospital to the number of 400 made no payments for their treatment, and in like manner no contributions for attendance were received from 1,483 out-patients, and the entire cost of the care of these patients, as well as the partial cost of the remaining patients, had to be paid from the donations and the income of the Hospital funds.

The usual large proportion of the cases treated in the Hospital were those of patients for whom difficulty was

anticipated, or who were brought in after labor had begun under circumstances which made their confinement complicated, if not attended with danger. To the performance of this service to the community, which the Hospital is properly called upon to perform, is due the death rate of 12 for the year.

The Cæsarean section was performed six times, with the result that the mother survived the operation in all but a single case. In one case the mother was removed from the Hospital soon after the operation, against the advice of the physician, and subsequently died. In five of the six cases the child was successfully delivered.

For the service of the Hospital during the past year there have been enlisted a medical staff of six physicians eminently skilled in the practice of obstetrics, a corps of six younger physicians who have recently graduated from the medical school and also, in general, from other hospitals, and a body of medical students to the number of 147, who have assisted the physicians in the care of out-patient cases. Supporting the physicians have been the Superintendent and the Director of Nurses, with 24 pupils of the training school, who acted as nurses, and the larger part of whom were graduates of training schools of general hospitals. The physicians on the out-patient service had the constant assistance from place to place, where needed, of five trained nurses and of others on occasions of emergency.

Aside from the instruction which the members of the Medical Staff have given to the House Officers, and they and the Superintendent and Director of Nurses have constantly imparted to the nurses in the house and at the bedside, 36 lectures comprised in two courses

have been given to the nurses by the members of the staff, and weekly recitations have been given by the Director of Nurses. Additional instruction has been afforded by the physicians of the staff, not only to the assisting medical students, but also to large numbers of other medical students and to physicians, in the regular and summer sessions of the medical school.

The larger work in and through the Hospital, in the study of obstetrics, the improvement of methods of practice, the advancement of knowledge, and the development of science, have kept apace with the special work of which the details are given in this report.

The current general expenses of maintaining the Hospital proper were \$19,236.28; the special expenses connected with the Out-patient Department were \$916.72, not including incidental expenses connected with the Assistant Physicians to out-patients and the externes; and other current general expenses have amounted to \$272.85, making the total cost of carrying on the Hospital for the year 1902, \$20,425.85.

The average cost of each house patient treated, taking as a basis the number of mothers only, has been \$32.51; and upon this basis the cost per week for each such patient has been \$14.14.

The number of house patients who have directly contributed to the expenses of their maintenance has been 200. For the care of 26 other cases money was, under a special arrangement with the Overseers of the Poor, received from the city of Boston. The total amount thus paid by and on account of these patients has been \$3,923, an average of \$17.36 for each such patient.

Out-patients to the number of 402 have contributed, in

sums ranging from fifty cents to fifteen dollars, the total amount of \$966.65, an average of \$2.40 by each out-patient.

The income from registration fees and other sundry sources has been \$652.09; cash donations have been received to the amount of \$3,950; and the income from investments has amounted to \$10,843.36. The total receipts from all ordinary sources during the year amounted to \$20,335.10. In addition, there has been received from the estate of the late Robert B. Brigham the sum of \$1,000, which his will generously provides shall be paid to the Hospital each year.

Legacies of \$5,000 from the estate of the late Joseph B. Glover and of \$250 from the estate of the late Samuel Bentley have been gratefully received.

It is to be regretted that the cash donations are again less than the previous year. Every effort should be made by the friends of the Hospital to increase the total sum of cash donations to such extent as to make it unnecessary to encroach upon the invested funds.

Notwithstanding the increased number of patients and the material advance in the price of provisions and coal, it is gratifying that the total cost of the maintenance of the Hospital has been \$260.30 less than for the previous year. This result has been brought about by the constant watchfulness and care on the part of those directly in charge of the administration of the Hospital.

A most welcome gift of the sum of \$2,000 has been received from a friend of the Hospital through Dr. Richardson. This sum has been set aside to be used in meeting the expense of installing modern steam laundry

and drying room machinery and appliances. For a number of years the present laundry facilities have been entirely inadequate for the work, and each year it has been hoped that the income might be sufficient to warrant the expense of making the changes, but without fulfilment until the receipt of this gift.

It has been felt that much needed painting and general renovation of the annex to the Hospital could not well be longer delayed, and the work has been done.

Additional improvements for the efficiency of the Hospital are needed, and the Committee urge especial efforts for securing further donations to enable the carrying out of the changes needed.

Equally welcome with the donations of money have been the gifts of useful articles for mothers and children, and flowers, fruits, and delicacies for the sick, which have been brought from day to day to the Hospital. These gifts have proved of the greatest comfort and value to the patients. Other gifts which have been made for those in the household who devote themselves to the care and comfort of the patients have been deeply appreciated.

The Instructive District Nursing Association and the "Helping Hand," connected with the Arlington Street Church, have placed at the service of the Out-patient Department five trained nurses, thus greatly adding to the efficiency of that department. The Instructive District Nursing Association also readily responds to any call for an additional emergency nurse.

The Committee in behalf of the Trustees desire to express their grateful appreciation to the Visiting Physician and his associates of the Medical Staff, to Mrs. Higgins, the Superintendent, and to Miss Aikman,

the Director of Nurses, for their faithful and devoted labors, to whom are due the successful results of the Hospital year.

The Trustees have also had the hearty co-operation of the Board of Lady Visitors, and the members of that Board have by their helpful visits and wise advice added largely to the well-being of the patients.

The report of the Visiting Physician is herewith submitted.

NATHANIEL THAYER,  
HENRY H. SPRAGUE,  
J. COLLINS WARREN,  
JAMES G. FREEMAN,

*Executive Committee.*

## (2.) *Report of the Visiting Physician.*

To the Trustees of the Boston Lying-in Hospital:

Gentlemen: The close of another year calls for the annual report of the work done by the Hospital.

The total number of women attended during the year in the Hospital and in the Out-patient Department was two thousand four hundred and twenty-nine. The number of patients in the Hospital was forty more and the number in the Out-patient Department eighteen less than last year. The total number of deaths has been twelve in the Hospital and two in the Out-patient Department. Of the fatal cases in the Hospital three were brought in when practically beyond help and with no possibility of a relief. One patient entered the Hospital early in the labor apparently in perfect health. While sitting in the ward she suddenly complained of feeling faint and died in a few moments. An autopsy showed no cause for death, and it is therefore reported as unknown.

During February, March, and April Dr. C. M. Green had the

immediate care of the Hospital. Dr. H. T. Swain was on duty in July, Dr. F. A. Higgins in August, Dr. L. V. Friedman in September, and Dr. F. S. Newell in October. The Visiting Physician had charge during the other months.

The Out-patient Department was under the general supervision of Dr. F. A. Higgins. During the year the daily average number of visits made was seventy-six and nine-tenths. The total number of visits during the year was twenty-eight thousand and seventy-five.

The Out-patient service was performed as follows: January, February, and March, Dr. F. A. Higgins; April, Dr. F. S. Newell; May, June, and July, Dr. H. T. Swain; August, Dr. L. V. Friedman; September, Dr. F. S. Newell; October and November, Dr. L. V. Friedman; December, Dr. F. S. Newell.

The "Helping Hand," supported by the ladies of the Arlington Street Church, which has for many years provided us with the service of a trained nurse, gave us this year two nurses, thus adding greatly to the comfort and good care of our Out-patient cases at the North End.

The Instructive District Nursing Association has the care of the Out-patient cases at the South End and in South Boston. Three of its nurses are assigned for this work. There are, therefore, five of our Hospital graduates at work in connection with the Out-patient Department, a most favorable condition for the best care of the patients. In case of any emergency which might require the assistance of a trained nurse, we are also able, through the kindness of the Instructive District Nursing Association, to avail ourselves of their emergency work and thus obtain at any time, night or day, the help of a trained nurse.

The Training School under the superintendency of Miss Agnes E. Aikman has been successful. Two courses of eighteen lectures were given. Each course covered the confinement and convalescence of patients and the care of infants. The first

course began in January, and was given by Doctors Higgins, Green, and Swain. The second course began in September, and was given by Doctors Friedman, Newell, and Richardson. The Senior House Physician has given clinical instruction to the nurses while attending the cases.

There have been received two hundred and forty-six applications from those desiring information with reference to entering the school. One hundred and fifty-six applications for admission were received. Of these fifty-five were accepted, ninety were rejected, and one hundred and one did not return their application papers filled out. Of the twenty-six probationers who entered the school twenty-four were enrolled as pupils after the probationary period and two failed to pass. One nurse has been dropped as not being satisfactory. Two left on account of illness and one owing to illness in her family. During the year sixteen nurses received diplomas. There are at present in the school fourteen nurses.

The Children's Aid Society has continued to solve the many questions arising as to the adoption of children, and all such cases have been referred to that Society. The Society for Aiding Destitute Mothers and Infants has rendered good service in helping those who needed such help as that Society could give.

The Cambridge and Boston Flower Mission have made their welcome visits, and the Boston Young Men's Christian Union has again placed carriages at the disposal of the matron.

Mrs. E. J. A. Higgins has completed her thirtieth year of continuous service in the faithful discharge of her duties as superintendent.

The following statistics will show the amount of work done during the year:

*Applications for admission:*

## GIFTS IN 1902.

---

- Mrs. Andrew Adie, Chestnut Hill, 22 articles of infants' clothing.  
Miss Amory, flowers.  
Mrs. John D. Adams, Brookline, 2 bushels turnips.  
Miss Leita Montgomery Amory, 331 Beacon Street, flowers.  
Boston Branch of the Needlework Guild, through Mrs. G. P. Sanger, 11 articles of infants' clothing and 12 huckabuck towels.  
Miss Blanchard, through Mrs. Gibson, 8 knit hoods for infants.  
Boston Sewing Circle, through Miss Loring, 37 Mt. Vernon Street, 25 undergarments for women, and 25 articles of infants' clothing.  
Boston Young Men's Christian Union, 10 tickets for carriage rides for invalids.  
Mrs. H. Brigham, 195 Brattle Street, Cambridge, 8 articles of infants' clothing, and 7 articles of women's underclothing.  
Boston Flower Mission, flowers weekly through the summer.  
Mrs. F. R. Bangs, 42 Fairfield Street, a box of pears, and illustrated papers and magazines.  
Mrs. J. Bradley and Miss Bradley, 247 Marlboro' Street, 206 articles of infants' clothing.  
Mrs. Shepherd Brooks, 92 Beacon Street, 69 articles of infants' clothing and pieces of cotton cloth.  
Mrs. W. L. Burrage, 317 Marlborough Street, 4 articles of women's underclothing and obstetrical supplies.  
Board of Lady Visitors, cakes and ice cream for the whole household at Christmas and a turkey dinner for the patients.  
Chamber of Commerce, old newspapers fortnightly during the year.  
Mrs. C. P. Curtis, 20 Commonwealth Avenue, ice cream and cakes for the whole household on Easter Sunday and on a warm day in July, also 40 white nightgowns for patients, and 21 tufted wraps for infants.  
Channing Circle of Arlington-Street Church, 29 articles of infants' clothing.  
Mrs. H. B. Chapin, old newspapers.

- Miss Alice Cotting, 249 Commonwealth Avenue, 44 articles of infants' clothing and old linen, also a large box of roses, and 2 boxes of old papers.
- Mr. W. F. Clark, flowers.
- Miss Case, 468 Beacon Street, 12 infants' hoods.
- Miss Margaret A. Coughlin, 9 Walnut Street, pecuniary aid for deserving patients on leaving the hospital.
- Mrs. Charles Cruft, 13 Hereford Street, 12 knitted bands for infants, and old linen.
- Mrs. Franklin Dexter, a box of strawberries for special patient, also a commode chair.
- Mrs. C. B. Denny, Blue Hill Road, 38 various articles of infants' clothing.
- Easter Card Mission, cards at Easter.
- Epworth Circle of King's Daughters, through Miss Edith M. Fawcett, 74 Hammond Street, Cambridge, 27 articles of infants' clothing, and a quantity of old linen.
- Eighty-seven Sewing Circle, through Mrs. Oliver Ames, 15 Commonwealth Avenue, 150 articles of infants' clothing.
- Mrs. J. G. Freeman, 470 Beacon Street, 18 white enameled wash basins for "case rooms," and 47 diapers for infants; pecuniary aid to deserving patients when leaving the hospital; ice cream for the whole household on Patriots' Day, the twenty-fourth of May, and New Year's Day, 1903. At Christmas a box of oranges.
- Mr. J. G. Freeman, 470 Beacon Street, 5 barrels of apples.
- Miss A. Farnsworth, Hotel Vendome, 6 infants' tufted wraps.
- Farmington (Conn.) School Society, through Mrs. J. Converse Gray, 222 Newbury Street, 26 various articles of infants' clothing.
- Farmington (Conn.) School Society, through Mrs. Helen G. Chase, 36 various articles of infants' clothing.
- From a friend, left at the door, 150 diapers and 10 flannel shoulder shawls for infants.
- From a friend at Christmas, 12 infants' knitted red hoods.
- Flowers from the funeral of the late Miss Ellen Frothingham.
- Flowers from the funeral of Gen. Charles Greely Loring.
- Flowers from the funeral of Mr. Henry Ives Turner, Longwood.
- Flowers from the funeral of Mr. John E. Devlin.
- Mrs. C. H. Gibson, 137 Beacon Street, 15 infants' white hoods, and 1 child's flannel skirt.

- Dr. C. M. Green, 78 Marlborough Street, 3 barrels and 1 basket of apples, a framed picture at Christmas.
- Mrs. F. B. Greene, 3 large and 8 small irrigators with tubing.
- Dr. F. A. Higgins, "Boston Medical and Surgical Journal."
- Herford Club, Arlington-Street Church, flowers on Easter Sunday.
- Mrs. Jane Hogarth, 11 iron-holders.
- Mrs. F. L. Higginson, 14 patients' white nightgowns, also a large box of flowers.
- Mrs. Charles S. Hamlin, large box of flowers.
- Mr. William Hutchinson, old newspapers.
- Mrs. A. A. Lawrence, damask tablecloth and 4 linen pillow slips, and old linen.
- Mrs. John Lavalley, 123 Marlborough Street, a box containing 8 articles of infants' clothing, an outfit for a special baby, with toilet soap and sponge, also 2 French flannel infants' cloaks and 4 flannel bands.
- Mrs. C. T. Lovering, 263 Commonwealth Avenue, a large quantity of fine old linen.
- A lady, through Dr. W. L. Richardson, 252 articles of infants' clothing.
- An out-of-town friend of Dr. W. L. Richardson's, 56 infants' flannel bands.
- Mrs. W. S. H. Lothrop, 26 Chestnut Street, a large parcel of illustrated papers.
- Miss E. B. Linder, 2 boxes chrysanthemums.
- M. A. Sewing Circle, through Mrs. Gibson, 4 infants' cotton slips and one woman's flannel skirt.
- M. A. Sewing Circle, through Mrs. Shepherd Brooks, 6 flannel skirts for women, and 22 articles of infants' clothing, and 40 infants' diapers.
- Manchester, Mass. Flower Mission, flowers through the summer, and 1 barrel of winter apples.
- Mrs. John Holmes Morrison, 44 Brimmer Street, 25 wrappers for babies in the hospital on Christmas day.
- Ninety Sewing Circle, through Mrs. Franklin Dexter, 18 flannel skirts and 60 diapers for infants.
- Miss L. H. Newell, 411 Commonwealth Avenue, spring lamb and green peas with ice cream, for the nurses' dinner on Decoration Day, also ice cream for the patients. Complete Thanksgiving dinner for the nurses at Thanksgiving, and ice cream for the whole household.
- At Christmas, 15 work-boxes in burnt wood fitted with sewing

- materials for the nurses, also a special gift to the matron, director of nurses, and bellmaid.
- Needlework Guild, through Mrs. T. S. Lockwood, 111 Bay State Road, 153 articles of infants' clothing.
- The resident nurses of 1900, 1901, and 1902, a clock for the nurses' dormitory hall.
- Mrs. Guy Norman, a box of flowers on Christmas day.
- Mrs. George L. Osgood, Walnut Street, Brookline, 23 articles of infants' clothing, and a parcel of fine old linen.
- Mrs. Henry O'Donnell, 38 McLean Street, old linen.
- S. S. Pierce Company, old newspapers.
- Mrs. R. F. Parker, Southville, Mass., 13 articles of child's worn clothing.
- Mrs. Benjamin F. Pitman, Carlton and Euston Streets, Longwood, a box of flowers.
- Mr. W. L. Pierce, 350 Beacon Street, a box of flowers on seven different occasions, and a hand washing machine.
- Mrs. H. P. Quincy, 452 Beacon Street, "London Graphic" for 1901.
- Dr. W. L. Richardson, 2 sterilizers for instruments; a large box of flowers for the nurses' table at Thanksgiving; at Christmas a gift of money to each of the employees, and for the nurses' table, nuts, raisins, figs, candy, and oranges.
- Miss Minnie Richardson, 2 infants' hoods.
- Miss Emily L. Sohier, 922 Beacon Street, 110 articles of infants' clothing.
- Miss M. D. Sohier, 922 Beacon Street, 17 hoods, 2 slips, and 1 Canton flannel wrapper for infants.
- Mrs. W. D. Sohier, a large box of roses.
- Mr. W. D. Sohier, a box of sweet peas. At Christmas, \$20 (twenty dollars) for Christmas celebration for nurses, director of nurses, housekeeper, and matron, also yearly subscription to the following magazines: "Life," "Harper's Monthly," "Munsey's," "Cosmopolitan," "Ladies' Home Journal," "Trained Nurse," "National Hospital and Sanitarium Record," "American Journal of Nursing," and the "Transcript."
- Mrs. R. H. Stevenson, 357 Beacon Street, a parcel of fine old linen for compress.
- "Spirit of '76" Sewing Circle, through Mrs. John Lowell, 24 Commonwealth Avenue, 297 articles of infants' clothing.
- St. Andrew's Church Flower Mission, flowers.

Mrs. Nathaniel Thayer, 25 patients' hospital nightgowns, and a potted lilac in bloom at Easter.

Unknown, by express, old papers.

Unknown, left at the door, 6 articles of infants' worn clothing.

Unknown, 22 articles of infants' worn clothing.

Unknown, 7 infants' white flannel nightgowns.

Unknown, left at the door by express, 1 infant's crocheted woolen sacque.

Unknown, left at the door, 60 diapers.

Mrs. J. Mason Warren, 63 Commonwealth Avenue, 4 knitted hoods for infants.

Mrs. W. B. Walker, Manchester, Mass., 117 various articles of infants' clothing.

Mrs. Alexander Whiteside, 6 Newbury Street, 7 infants' knitted hoods.

Women's Christian Temperance Union, 14 Beacon Street, flowers.

## ARTICLES USED IN THE HOSPITAL.

---

As inquiries are often made regarding the articles required at the Hospital, the following list is given of such as are always needed :

### PATIENTS' BED LINEN.

**Sheets.** — Width, 2 yards; length, material cut  $2\frac{3}{4}$  yards long, which allows for a hem  $1\frac{1}{2}$  inches deep at top and  $\frac{1}{2}$  inch deep at bottom.

**Cross Sheets.** — Width, 45-inch unbleached cotton; length, material cut 2 yards long, which allows for a hem  $\frac{1}{2}$  inch deep at each end.

**Pillow Covers.** — Width, 20 inches (40-inch white cotton folded); length, material cut 1 yard long, which allows for a hem  $1\frac{1}{2}$  inches deep.

**Binders.** — One yard wide unbleached cotton, loosely woven. Cut 45 inches long, which includes narrow turnings. The selvage edges should be folded together and stitched, and the ends also should be stitched, making, when finished, a double binder 18 inches deep and  $44\frac{1}{2}$  inches long.

**Patients' Bed-Gown,** made of cotton (white preferred), is a short open sacque buttoned in front, the pattern for which can be had at the Hospital.

### INFANTS' CLOTHING.

**White Slip,** made of soft white cotton.

**White Sleeveless Flannel Slip,** cotton and wool flannel preferred.

**White Shirt** (open sacque), made of very soft white cotton or cambric.

*Paper patterns for the above articles can be had at the Hospital.*

**Flannel Band,** made of smooth white flannel, 7 inches deep and 22 inches long, finished with overcast raw edges.

**Diapers,** made of white cotton diaper material, 18 inches wide, cut 37 inches long, narrow hems.

**Shawl**, made of white Canton flannel (medium grade). If the material measures 33 inches in width, cut 35 inches in length, which allows for a hem 1 inch deep at each end. Cat-stitch the hem with white thread.

**Note.** — As many of the patients have little or no clothing for their babies, the Superintendent of the Hospital is very glad to receive any outgrown or partially worn articles of infants' wearing apparel. Blankets, or anything which can be used as an outside wrap, are especially acceptable.

## HOUSE PHYSICIANS.

---

Besides the permanent Medical Staff of the Hospital there are constantly in attendance three House Physicians. Each House Physician is appointed for the term of six months, and serves the first two months as Junior and the last two months as Senior, in the direct charge of the medical service, under the supervision of the Visiting Physician. The intervening two months he has the direct care of the Out-patient Department, under the supervision of the Physicians to Out-patients.

House Physicians are required to reside in the Hospital, and are furnished their breakfasts in the house; their other meals are provided outside of the Hospital, at the expense of the corporation.

The appointments are made in May and November of each year by the Executive Committee, on recommendation of the Visiting Physician, to whom application for the positions should be made in writing. Application should be made not later than May 1st for the services beginning the first Mondays in August, October, and December, and not later than November 1st for the services beginning the first Mondays in February, April, and June.

Diplomas for satisfactory service are given House Physicians at the expiration of their terms.

## BOSTON LYING-IN HOSPITAL TRAINING SCHOOL FOR NURSES.

---

From the reopening of the Hospital in 1873 the work of teaching women how to become good nurses in confinement cases gradually developed until 1888, when the Trustees formally established a Training School.

It is the purpose of the Training School to give to women who desire to become maternity nurses a thorough training for their calling, both in theory and practice. A systematic course of instruction is afforded, and the entire nursing of the Hospital is performed by the pupils of the Training School.

The School is so arranged as to admit for different terms both those who have graduated from the training schools of approved general hospitals and others who have had less hospital or institutional experience in nursing.

Nurses who have acquired a diploma from a recognized school are received for special instruction in the department of obstetrics. The term for these pupils is six months; and if they successfully fulfil the requirements during this period, and pass the necessary examinations, they will, upon the termination of their service, receive a diploma from the Hospital.

Women who have received little or no previous teaching or practice will likewise be received as pupils upon furnishing the required evidence as to their fitness and capacity for the work. Such applicants should be between the ages of twenty-three and thirty-five. They must be strong, healthy, and energetic. They are expected to be of cheerful and willing disposition, of quiet and orderly habits, and to be self-possessed, honest, and

trustworthy. These pupils are required to perform a satisfactory service of fifteen months, and at the expiration of this period, after passing a satisfactory examination, likewise receive the Hospital's diploma.

All pupils are received during the first month upon probation; but if found satisfactory upon this trial, the time will be counted as the first month of service. They are required to reside constantly at the Hospital, and, besides attending the patients and assisting the physicians, are required to keep in proper order and cleanliness the wards and other rooms devoted to the patients. While on duty they are required to wear white caps and aprons and plainly made uniform dresses, and must conform to the rules established for their conduct.

While the education and training which are afforded are intended to be a full equivalent for their services, there is given the pupils, toward defraying their necessary personal expenses, — to graduates from other schools \$10 per month during the first three months, and \$14 per month during the remainder of their term; and to others \$10 per month during the first eight months, and \$14 per month during the remainder of the term, which sums are given in addition to board and washing. Pupils are required to bring with them or provide such articles of clothing, with the exception of the materials for their caps, as are required for the proper performance of their duties.

There are no fixed dates for the beginning of service; but candidates for the School are accepted in advance, and are called upon for active service as vacancies occur. They are, of course, received, as a rule, in the order of acceptance; but those desiring to enter with less delay can usually anticipate a fixed date by enrolling their names upon the emergency list.

The Trustees reserve the right to terminate the connection of any nurse with the Hospital at any time, for such reason as they shall deem expedient.

Instruction is given by means of lectures, recitations, and

teaching at the bedside and in the regular performance of duties.

Two distinct courses of weekly lectures, each running through the period of six months, are given by the various members of the Medical Staff, which are intended to cover the whole ground of confinement, nursing, and care of infants:

The first course begins in September and the second course in February. The two courses are identical as far as the subjects are concerned, and cover the care of normal cases of labor, the treatment of emergencies and operative obstetrics, and the care of infants.

Clinical instruction to the nurses while attending cases is given by the senior House Physician; and weekly recitations are held by the Director of Nurses, with the use of approved text-books.

The nurses are in addition taught by the Director of Nurses practically at the bedside the details of the care of women during labor and convalescence,

Examinations are held from time to time; and at the end of the term a careful and thorough examination of each pupil for diploma is conducted by the Visiting Physician.

During the year 1902 sixteen nurses have successfully completed their service and received a diploma, and have gone forth into the community to practise their profession.

For detailed information and circulars as to applications and requirements for admission to the School, and as to the instruction and duties of pupils, application should be made to Mrs. E. J. A. Higgins, Superintendent Boston Lying-in Hospital, 24 McLean Street, Boston, Mass.

## APPLICATION OF PATIENTS FOR ADMISSION TO THE HOSPITAL, AND OF OUT-PATIENTS FOR ATTENDANCE.

---

Applications for admission to the Hospital, or for attendance upon out-patients, should be made to the Visiting Physician at the Hospital, between the hours of *ten* and *eleven* in the forenoon of any day except Sunday; and all such applications should, if possible, be made not less than one week before the expected date of confinement. Cases of emergency are, however, received at any time.

The regular charge for treatment in the Hospital for patients residing in Boston is \$20; for those residing elsewhere, \$30. This charge must be paid upon entrance to the Hospital, and covers the confinement, and board and care for two weeks following confinement, and for any further time during which the patient may be unable to leave the Hospital.

Deserving persons, residents of Boston, who are unable to pay, are admitted and cared for without charge; and non-residents may also be admitted free by special vote of the Executive Committee.

For out-patients, medical attendance during confinement is furnished at their homes, and without charge, to women residing within the limits of the city proper who are unable to pay.

## VISITORS TO PATIENTS.

---

Relatives are admitted to visit patients in the wards between the hours of three and four in the afternoon of any day except Sunday; but no patient is allowed, except by the special permission of the Visiting Physician, to receive more than one visitor a day, or to receive any visitor whatever before the fifth day succeeding her confinement.

No visitor is allowed to bring to a patient any article of food or drink except by the special permission of the Visiting Physician; and all articles brought with such permission must be left with the Matron for the use of the patient.

## HOUSE PHYSICIANS

TO WHOM DIPLOMAS HAVE BEEN GIVEN, WITH THE DATE OF  
THEIR DIPLOMA.

- 1882 ALLEN, GARDNER WELD
- 1875 APPLETON, WILLIAM, Jr.
- 1890 ARNOLD, HORACE DAVID, M.D.
- 1885 AYER, SILAS HIBBARD, M.D.
- 1899 BADGER, GEORGE SHERWIN CLARKE, M.D.
- 1897 BARNEY, CHARLES NORTON, M.D.
- 1892 BARTOL, JOHN WASHBURN, M.D.
- 1891 BATES, EVERETT ALANSON, M.D.
- 1884 BELL, ROBERT, M.D.
- 1876 \*BOGMAN, EDWARD YOUNG
- 1895 BOTTOMLEY, JOHN TAYLOR, M.D.
- 1886 BRACKETT, ELLIOTT GRAY, M.D.
